Another celebration of the 'witching season' in this collection of miscellany on the subject compiled by Gillian Osband. At least this one has the virtue of attempting to deal with varying aspects of the magical rites in a comprehensively entertaining manner, helped by Caroline McDonald-Paul's splendid illustrations. There has also obviously been an effort to search out new material, especially in the folk tales from different countries, rather than haul out the tired old chestnuts that inevitably re-surface in this type of production.
