This books signalled a promise which Ms Hughes still displays five novels later, despite one disaster and an also-ran . Secessionist talk in her native Canada probably helped her treatment of wrangles between greedy Earth and the lunar colony, whose problems are shared by the people in the submarine Conshelves. Kepler, Moon Governor's son, must scotch the extremist gillmen's violent plans if Dad is to win the UN vote. The adventures might begin too late for the story to galvanize the back row --- serious S. F. often demands too many ideas and details early on for that --- but try it with aficionados, unless they're politically radical.
